

Approaches and Tools for Developing Web-Enhanced Lessons: Final Product Template

Introduction

As the final product for this workshop, you will create your own Web-Enhanced Lesson. This workshop will introduce you to a number of different approaches and tools for building these lessons. Use this template to help you manage your thoughts as you work through the workshop. Save the file to your desktop or into a folder on your computer with a new name and then you can type directly onto the template and cut and paste your URL's into the table below.

Possible Lesson Topic

Brainstorm some topics for your final product.

Key Goals/Standards to Be Addressed

As you develop your lesson topic, consider what goals and standards you would like the final lesson to address.

Overarching Question(s)

What are the Big Question(s) you'd like your students to answer as a result of doing this activity?

Additional Notes

Include any additional notes here.

If you are planning a WebQuest, you will need to consider what roles you will have your students play. Three to four roles is usually a good number.

Activity Formats

Based on what you have seen of the four activity formats presented in this workshop, jot down some pros and cons for each as they relate to your chosen topic.

Hotlists	
Pros:	Cons:
Treasure Hunts	
Pros:	Cons:
Multimedia Scrapbooks	
Pros:	Cons:
WebQuests	
Pros:	Cons:

Website Research

Record the titles and URLs of sites you visit, and jot down a few notes about each site. Where could each site fit into a lesson? Which sites make most sense as background material? Material for research? If you need to include more URLs, you can press the "Tab" key with the cursor in the lower-right cell of the table to add more cells.

If you are planning a Treasure Hunt, what questions might be appropriate to ask your students from these resources?

If you are planning a WebQuest, which URLs would work best for which roles?
